PROJECTS

Online Bookstore

- Developed a fully functional online bookstore application using Java, Spring Boot, Angular, and MySQL.
- Implemented user authentication and authorization features using JSON Web Tokens (JWT).
- Created RESTful APIs for handling CRUD operations on books and user profiles.
- Integrated front-end components using Angular for dynamic user interfaces.
- Implemented responsive design using Bootstrap for better user experience across devices.
- Ensured data integrity and security by implementing input validation and encryption techniques.
- Collaborated with team members to design and implement database schema and application architecture.
- Utilized version control with Git/GitHub for efficient code management and collaboration.

Professional Development

- Completed Java Full Stack Developer certification from Inmakes Infotech, Kerala, Kochi.

Volunteer Experience

- NSS Volunteer for 2 years.

Leadership Experience

- Led a team project to organize a charity fundraiser event for underprivileged children.
